Table of Contents for Volume 43

A Neutral Atmosphere for Hardening (cp)	736	Disposal of Recoveries, by H. J. Beattie	568	Lead Equipment Used in Industry, by F. E. Wormser	223
A New Soft Solder; Lead-Arsenic-Antimony Alloy, by R. L. Dowdell, M. E. Fine, J. F. Elliott and I. C. Mattson.	56	Down-Grading Chart for Brasses and Bronzes, by Carter S. Cole	406	Limit Nitrogen in "Stabilized" Stainless, by J. H. G. Monypenny (c)....	246
A Versatile Metallographic Polishing Process, by Mildred Ferguson	743	Effects of Tin in Carbon Steel, by J. W. Halley (a)	936	Limitations of Radiography as an Inspection Method, by Vernon I. E. Wiegand	229
Acceptance Standards for Light Alloy Castings, by W. H. Burroughs	227	Electroplating Metals, by F. R. Morral (d)	741	Low Nickel Steel for Roller Bearings (cp)	909
Aircraft Tubing Data, by Summerill	574	Elementary Metallurgy, by W. T. Frier (b)	573	Machinability of National Emergency Alloy Steels, by O. W. Boston	543
American Ordnance Tested in Africa (cp)	734	End-Quench Test and Its Application, by Walter E. Jominy	77	Magnesium Alloys, by H. S. Jerabek, W. H. Gross and R. T. Wood (d)....	63
Ammonia Converter of Welded 5% Chromium Steel, by J. Schuyten	218	English Chemical Industry Uses High Carbon 18-8 Ti, by Fred H. Keating (c)	73	Magnetic Balance for Inspection, by A. V. de Forest (c)	69
Ample Furnace Capacity for Aluminum Forge Shop (cp)	411	Estimate of Steel for 1943	100	Materials for Aircraft Instruments (cp)	735
An Aid for Teaching Metallography, by Charles Y. Clayton (bp)	224	Explosions of Gas Cylinders Containing Automobile Fuel, by Albert M. Portevin (c)	242	Measurement of Case Depth, by John W. Watson (bp)	224
Atomic Structure of Martensite (a)	762	Failure of the S.S. Schenectady, Report of Investigation by American Bureau of Shipping	922	Mechanical Properties of NE, S.A.E. and Other Hardened Steels, by Walter G. Patton	726
Avoiding Scale on End-Quench Test Piece, by George F. Comstock (bp)....	225	Fatigue Failures in Common Machine Parts, by J. O. Almen	737	Memory Aids for Welders, by Joseph V. Kielb (bp)	225
Bell Telephone Laboratories Deep in War Work (cp)	911	Fatigue no Respector of Alloy Steels (cp)	908	Metallography by Electron Microscope, by David Harker and Vincent J. Schaefer (c)	68
Beryllium: Facts About the Metal, Rather Than Fancies, Digest of Report by War Metallurgy Committee.	904	Ferrous Production Metallurgy, by John L. Bray (b)	575	Metalurgical Aspects of the National Emergency Steels	77
Better Cupola Practice Saves Coke & Scrap (cp)	208	Fixing Bearings in Steel Shells Without Using Tin, by Walter Coopey (c)	75	Metalurgy of Copper, by Joseph Newton (b)	575
Beware Impurities in Zinc Alloys.....	930	Flakes in NE Steel Billets, by E. O. Dixon (c)	72	Mobile Gun Vs. the Tank (cp)	734
Biographical Notes of Eminent Metallurgists—Herbert James French, President, American Society for Metals	216	Flame Hardener (cp)	412	Modern Blast Furnace Refractories, by Raymond E. Birch (a)	932
Boron—a Nifty Alloy for Steel (cp)....	735	Future Metal Balance (cp)	736	Modern Chip Handling, by Arthur M. Perrin	566
Boundary Lubrication, by J. T. Burwell (a)	582	Handling of Liquid Ammonia for Nitriding and Other Atmospheres, by C. V. Snell	245	Mythical White Metal and Other Super-Hard Irons, by C. W. Davis (c)....	74
Brisk Sales of a New Lead Alloy (cp)	911	Hard Spots Formed During Inspection, by E. F. Green (bp)	747	National Emergency Steels; NE 1300	711
Calculated Hardenability Guides Mill Schedules (cp)	61	Hardenability of Common Toolsteels, by Stewart M. DePoy (d).....	918A	Naval Armor	383
Calculation of Jominy End-Quench Curve From Analysis, by Joseph Field	402	Hardening Cracks Avoided, by William P. Matthew (bp)	748	Necessity for Making Full Scale Tests, by Jacob B. Friedmann (c).....	244
Calibrating a Microscope's Magnifying Power With Shim Stock, by D. J. Mack (bp)	91	Hardness and Hardness Measurements, by Samuel R. Williams (b)	576	Network of Shops for Heat Treating Small Armor, by Lloyd Stouffer.....	390
Calibration of Platinum Thermocouple at Steel Melting Range, by C. R. Barber (a)	598	Hardness Conversion for Cartridge Brass (d)	235	New Developments in Equipment, Films and Technique, by L. W. Ball	233
Carburizing Gears in the Electric Salt Bath Furnace, by William F. Sorenson	237	Hardness Testing of High Speed Steel at High Temperatures, by Edward C. Bishop and Morris Cohen	413	Alfred V. de Forest	719
Carburizing Grades of NE Steels, by T. A. Frischman	86	Has This Steel Been Double-Crossed? A Ghost by Alex Gobus	74	New Plant for Making Magnesium (cp)	908
Cartridge Brass (an Elementary Introduction), by L. E. Gibbs	897	Have You Recently Appraised the Cutting Fluids? by Joseph Geschell... ..	548	Nitriding Rolls Royce Crankshafts (cp)	735
"Case Depth", by C. H. Bierbaum (c)	70	Heat Treating for Machinability, by L. E. Webb	87	Note on Brittle Ships (cp).....	911
Chemical Analysis by Colorimeter (cp)	910	Heat Treatment of Small Gun Barrels, by T. Denness (c)	242	Openhearth Men Discuss Wartime Problems, by H. J. Forsyth.....	901
Compressed Surfaces Improve Endurance (cp)	909	Heating of Heavy Forging Billets (w). Help! Help! by Metallurgicus (bp)....	91	Ordnance Parts With Unique Properties (cp)	412
Computations of Hardenability, by Metallurgicus (bp)	224	How to Be a Prominent Metallurgist (cp)	208	Peened Surfaces Improve Endurance of Machine Parts, by J. O. Almen.....	209
Computations of Hardenability; Effect of Undissolved Carbides, by George A. Roberts (bp)	746	Impact Cleaning, by William A. Rosenberg (b)	576	Pistol and Hand Grenade, a Ghost by Arthur H. Valentine	71
Computing Strength of Normalized Steel From Its Analysis, by Francis M. Walters, Jr.	76	Improved Electron Microscopes (cp)	560	Planning Heat Treatment by S-Curves, by R. L. Rickett	79
Conservation of Metals in Cannery Machines	408	Improving the Oil Quench (cp)	412	Plasticity of Cold Metals, by Jacob B. Friedmann (c)	71
Contaminated Thermocouples, by F. Kunk (bp)	748	Influence of Cast Structure on Mechanical Properties, by L. Northcott (a). ..	586	Platinum in Commerce, by Charles Engelhard	250
Converting Semi-Muffle Furnace to Full Muffle Type, by R. F. Schaffer (bp)....	572	Inspection in Mass Production (cp)....	910	Plowshares to swords (cp)	207
Convincing Realities (cp)	560	Iron and Steel in Nazi Germany (a)....	108	Powder Metal Compacts of Large Size (cp)	412
Decarb in Complex Alloy Steel, by Merrill A. Schell (bp)	746	Iron Deposition, by C. T. Thomas (a). ..	438	Practical Arc Welding, by W. J. Chaffee (b)	574
Decarburized Zones, by Frank J. Altmann (bp)	570	Iron Men and Their Dogs, by Ferdinand C. Latrobe (b)	574	Practical Programs for Reclamation of Metal Scrap	561
		Iron Powder, by Charles Hardy	62	Process Practices in Aircraft Industry, by Frank D. Klein, Jr. (b).....	574
		John Johnston, Chemist, Metallurgist, Organizer of Research	717	Properties of Important Wrought Chromium-Iron Alloys (d)	560A
		"Krupp" Steel Equaled by NE Steel 8620 (cp)	61	Properties of Important Wrought Chromium-Nickel-Iron Alloys (d)	412A
		"Krupp" Steel Improved by Hot Quenching (cp)	60		

(a) Abstract; (b) Book Review; (bp) Bits & Pieces; (c) Correspondence; (cp) Critical Points; (d) Data Sheet; (w) War Products Consultation.

Properties of NE Steels at Room and Subnormal Temperatures, by Joseph H. Jones	83
Quality Control of Munitions, by G. D. Edwards (a)	426
Quench on Rising or Falling Heat? by Metallurgicus	715
Quick Immersion Technique for Molten Steel Temperatures, by J. H. G. Monypenny (c)	67
Radiography as an Inspection Tool	226
Rapid Identification Tests for Manganese and Sulphur in Steel, by W. O. Philbrook (bp)	572
Residual Stresses in Welded Structures, by Robert E. Kinkhead	924
Revised List of National Emergency Alloy Steels	90
Salvage in a Large Industry, by Frank D. Kent	564
Saves, Both on Alloys and Heat Treatment (cp)	207
Scrap Reclamation Program for a Medium Sized Plant, by E. S. Hoopes	562
Selection of Toolsteel by Its Hardenability, by Stewart M. DePoy	917
Ships Welded on a Production Line, by George F. Wolfe	550
Shop Performance of NE Steels, by Glen C. Riegel	82
Silver Shortages	249
Soft Steel Plate, Cracked Ships, & Internal Stresses	919
Solder, a Good Carburization Stop-Off, by Glenn Thiersch (bp)	748

Some Notes on Armor Plate for Ships and Tanks	383
Sorting of Steel, by R. J. Brown (bp)	92
Sources of Hydrogen in Steel and Means for Its Elimination, by Carl A. Zapffe	397
Spot Test for Manganese in Steel, by G. H. Holtz and Albert Neudoerffer (bp)	746
Steel Cartridge Cases for Artillery Ammunition, by Harold R. Turner	49
Steel Cartridge Cases From Extruded Cups, by Robert B. Schenck	912
Steel Cartridges Eke Out Our Copper Supply (cp)	411
Steel From 100% Scrap (cp)	61
Steel Plates for Shipbuilding, by R. E. Zimmerman	919
Steel Shot to Protect Edges of Mount, by Harold W. Wyatt (bp)	572
Steps to Minimize Amount of Scrap Produced, by J. L. Cannon	561
Substitute for 90 Cu, 10 Sn Bearings, by M. F. Garwood and E. H. Stilwell (a)	396
Supply of Non-Ferrous Scrap (cp)	560
Supposed Graphite in Carburized NE and SAE Steels, by John Welchner and Roy W. Roush	889
Tank Armor, by Brig. Gen. G. M. Barnes (a)	389
Tank Design (a)	389
Temporary Set in Heavy Springs (w)	54

Tests on NE 8630 Steels for Welded Air Frames, by Morse Hill	555
The Pyrotechnia of Vannocelo Biringuccio, translated by Cyril Stanley Smith and Martha Teach Gnudi (b)	573
Thin Races Held to Close Dimensions (cp)	910
Thoughts on Bearings—New & Old (cp)	208
Timer for Photomicrography, by J. L. Waisman (bp)	747
Transformation of Highly Alloyed Austenite (Correction)	67
Twelve Temperings to Harden Austenitic Die, by Stewart M. DePoy (bp)	92
"Under-Hardening" of Steel, by Metallurgicus (bp)	570
Uniform Furnace, Varying Quenches (cp)	736
Use of Replica Coatings in Metallography, by J. I. Wexlin (c)	69
Wanted, an Inspection Method, by Metallurgicus (bp)	745
Weld Quality Vs. Welding Speed, by A. B. White (c)	70
Weldability of NE 1330 and NE 1335 (Laboratory Tests), by Oscar E. Harder and C. B. Voldrich	409
Welded Hull for Combat Tank, by Edgar Brooker and Loren L. Elliott	392
What Is "Decarb"? by Eugene M. Smith (bp)	91
X-Ray Inspection on a Production Scale, by Tom A. Triplett	226
Zinc Industry in 1942, by Ernest V. Gent	256

List of Authors

Almen, J. O.—Fatigue Failures in Common Machine Parts	737
Peened Surfaces Improve Endurance of Machine Parts	209
Altmann, Frank J.—Decarburized Zones (bp)	570
Ball, L. W.—New Developments in Equipment, Films and Technique	233
Barber, C. R.—Calibration of Platinum Thermocouple at Steel Melting Range (a)	598
Barnes, G. M.—Tank Armor (a)	389
Beattie, H. J.—Disposal of Recoveries	568
Bierbaum, C. H.—"Case Depth" (c)	70
Birch, Raymond E.—Modern Blast Furnace Refractories (a)	932
Bishop, Edward C. and Morris Cohen—Hardness Testing of High Speed Steel at High Temperatures	413
Boston, O. W.—Machinability of National Emergency Alloy Steels	543
Bray, John L.—Ferrous Production Metallurgy (b)	575
Brooker, Edgar and Loren L. Elliott—Welded Hull for Combat Tank	392
Brown, R. J.—Sorting of Steel (bp)	92
Burroughs, W. H.—Acceptance Standards for Light Alloy Castings	227
Burwell, J. T.—Boundary Lubrication (a)	582
Caine, J. B.—Impact Cleaning by William A. Rosenberg (b)	576
Cannon, J. L.—Steps to Minimize Amount of Scrap Produced	561
Chaffee, W. J.—Practical Arc Welding (b)	573
Clayton, Charles Y.—An Aid for Teaching Metallography (bp)	224
Cohen, Morris and Edward C. Bishop—Hardness Testing of High Speed Steel at High Temperatures	413
Cole, Carter S.—Down-Grading Chart for Brasses and Bronzes	406
Comstock, George F.—Avoiding Scale on End-Quench Test Piece (bp)	225

Cooney, Walter—Fixing Bearings in Steel Shells Without Using Tin (c)	75
Critical Points, by E. E. Thum, Editor	736
A Neutral Atmosphere for Hardening American Ordnance Tested in Africa	734
Ample Furnace Capacity for Aluminum Forge Shop	411
Bell Telephone Laboratories Deep in War Work	911
Better Cupola Practice Saves Coke & Scrap	208
Boron—A Nifty Alloy for Steel	735
Brisk Sales of a New Lead Alloy	911
Calculated Hardenability Guides Mill Schedules	61
Chemical Analysis by Colorimeter	910
Compressed Surfaces Improve Endurance	909
Convincing Realities	560
Fatigue no Respector of Alloy Steels	908
Flame Hardener	412
Future Metal Balance	736
How to Be a Prominent Metallurgist	208
Improved Electron Microscopes	560
Improving the Oil Quench	412
Inspection in Mass Production	910
"Krupp" Steel Equaled by NE Steel 8620	61
"Krupp" Steel Improved by Hot Quenching	60
Low Nickel Steel for Roller Bearings	909
Materials for Aircraft Instruments	735
Mobile Gun Vs. the Tank	734
New Plant for Making Magnesium	908
Nitriding Rolls Royce Crankshafts	735
Note on Brittle Ships	911
Ordnance Parts With Unique Properties	412
Plowshares to Swords	207
Powder Metal Compacts of Large Size	412
Saves, Both on Alloys and Heat Treatment	207
Steel Cartridges Eke Out Our Copper Supply	411
Steel From 100% Scrap	61
Supply of Non-Ferrous Scrap	560
Thin Races Held to Close Dimensions	910
Thoughts on Bearings—New & Old	208
Uniform Furnace, Varying Quenches	736

Data Sheets	
Electroplating Metals, by F. R. Morral	741
Hardenability of Common Toolsteels, by Stewart M. DePoy	918A
Hardness Conversion for Cartridge Brass	235
Magnesium Alloys, by H. S. Jerabek, W. H. Gross and R. T. Wood	65
Properties of Important Wrought Chromium-Iron Alloys	560A
Properties of Important Wrought Chromium-Nickel-Iron Alloys	412A
Davis, C. W.—Mythical White Metal and Other Super-Hard Irons (c)	74
de Forest, Alfred V.—Magnetic Balance for Inspection (c)	69
New Pathways in Engineering	719
Denness, T.—Heat Treatment of Small Gun Barrels (c)	242
DePoy, Stewart M.—Hardenability of Common Toolsteels (d)	918A
Selection of Toolsteel by Its Hardenability	917
Twelve Temperings to Harden Austenitic Die (bp)	92
Dixon, E. O.—Flakes in NE Steel Billets (c)	72
Dowdell, R. L., M. E. Fine, J. F. Elliott and I. C. Mattson—A New Soft Solder; Lead-Arsenic-Antimony Alloy	56
Edwards, G. D.—Quality Control of Munitions (a)	426
Elliott, J. F., I. C. Mattson, M. E. Fine and R. L. Dowdell—A New Soft Solder; Lead-Arsenic-Antimony Alloy	56
Elliott, Loren L. and Edgar Brooker—Welded Hull for Combat Tank	392
Engelhard, Charles—Platinum in Commerce	250
Ferguson, Mildred—A Versatile Metallographic Polishing Process	743
Field, Joseph—Calculation of Jominy End-Quench Curve From Analysis	402
